

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

West Indian mosses—I

ELIZABETH GERTRUDE BRITTON

(WITH PLATE 25)

A. WEST INDIAN MOSSES KNOWN TO LINNAEUS

In Linnaeus' *Species Plantarum** 8 genera† and 103 species of mosses are recognized, of which only 2 are known to be tropical American in their distribution, ranging from southern Florida to South America. The first of these tropical species is *Bryum albidum* L. (p. 1118) known to Dillenius‡ as *Bryum nanum*, *lariginis foliis albis*, and now known as *Octoblepharum albidum* (L.) Hedw., with the type locality on the island of New Providence in the Bahamas.

The other species, *Rhizogonium spiniforme* (L.) Bruch was the first species of *Hypnum* named by Linnaeus and it also was based on a Dillenian description and plate.§ He called it "the Herring's-Bone *Hypnum*" and his specimens were sent to him from Mt. Diabolo, Jamaica, by Sir Hans Sloane. Its range through the tropics is even wider than that of *Octoblepharum*, including the Islands of the Pacific; both species are known to occur not only throughout the American tropics but also in Asia and Africa.

* 1106-1130. 1753.

§ *Historia Muscorum* 332. *pl.* 43. *f.* 68. 1741.

[The BULLETIN for November (40: 599-652. *portrait*) was issued 24 N 1913.]

1. OCTOBLEPHARUM ALBIDUM (L.) Hedw. Descr. 3: 15. 1791
Bryum albidum L. Sp. Pl. 1118. 1753.

TYPE LOCALITY: New Providence, Bahamas.

DISTRIBUTION: Florida and the Bahamas, throughout the West Indies; in Cuba, Jamaica, Haiti and St. Domingo, Porto Rico, Dominica, St. Thomas, St. Kitts, Montserrat, Guadeloupe, Martinique, St. Lucia, Grenada to Trinidad; also in South America and tropical regions of Africa and Asia.

ILLUSTRATIONS: Dill. Hist. Musc. *pl.* 46. *f.* 21; Hedw. Descr. 3: *pl.* 6A; Card. Rech. Anat. Leuc. *pl.* 12. *f.* 61.

EXSICCATAE: Sull. Musci Cub. Wright. 55. 1861; Husnot, Pl. Ant. Fr. 121. 1868; Austin, Musci App. Suppl. 478. 1874; Ren. & Card. Musci Am. Sept. Exsicc. 213; Holz. Musci Acroc. Bor. Am. 57; Small, Mosses S. U. S. 52.

2. RHIZOGONIUM SPINIFORME (L.) Bruch, Flora 29: 134. 1846
Hypnum spinaeforme L. Sp. Pl. 1122. 1753.
Mnium spiniforme C. Müll. Syn 1: 175. 1849.

TYPE LOCALITY: Mt. Diabolo, Jamaica, *Hans Sloane*.

DISTRIBUTION: In wet woods, in tropical regions of all portions of the world. Southern United States: Georgia, Alabama, Louisiana, Florida; Jamaica, Cuba, Haiti, Porto Rico, Guadeloupe to S. America; Mexico, Guatemala, Costa Rica, and Panama.

ILLUSTRATIONS: Sloane, Hist. Jam. *pl.* 25. *f.* 4. 1707; Dill. Hist. Musc. 332. *pl.* 43. *f.* 8. 1741.

EXSICCATAE: Sull. Musci Cub. Wright. 58. 1861; Husnot, Pl. Ant. Fr. 152. 1868; Austin, Musci App. Suppl. 516. 1874; Ren. & Card. Musci Am. Sept. Exs. 64; Holz. Musc. Acroc. Bor. Am. 174; Pringle, Musci Mex. 10482.

Another of the Linnaean species, *Hypnum cuspidatum* L., has been found in the high mountains of Jamaica. *Pogonatum urnigerum* L. Sp. Pl. 1109. 1753, was also credited to Jamaica, following Dillenius, who quotes Hans Sloane's History of Jamaica and mistook his *f.* 5, *pl.* 25, for this European species. *F.* 4 of the same plate is unmistakable for *Rhizogonium spiniforme*.

B. WEST INDIAN MOSSES KNOWN TO OLOF SWARTZ

In his Prodrumus, Swartz* retained 5 of the generic names

* Olof Swartz, Nova Genera & Species Plantarum seu Prodrumus, etc. 138-142. 1788.

used by Linnaeus* and enumerated 41 species, which as at present recognized belong to 37 different genera, three of these having their type localities in Hispaniola (Haiti and Santo Domingo), all the rest in Jamaica.

In studying the collections made by Mr. Wm. Harris in Jamaica and our own later collections, a special effort has been made to obtain an accurate knowledge of these Swartz types and Dr. A. Le Roy Andrews, of Cornell University, very kindly consented, when he visited Stockholm in the summer of 1912, to examine these types for me and compare them with specimens from our own collections in Jamaica, sent as duplicates to the Naturhistoriska Riksmuseum. Dr. Andrews was able to see and compare the original specimens with ours in all but two cases: *Bryum parasiticum* Sw. [= *Syr-rhopodon parasiticus* (Sw.) Besch.] and *Hypnum congestum* Sw. [= *Pleuropus congestus* (Sw.) Broth.], which species we have not yet been able to recognize, the former being from Hispaniola and the type lacking in Swartz' herbarium, the latter from Jamaica and Haiti. We suspect from the illustration given by Hedwig that the latter is probably referable to *Palamocladium Bonplandi* (Hook.) Broth., which Brotherus later refers to *Pleuropus*, though he states that he has not seen specimens of *Pleuropus congestus*.

In 1806 Swartz discarded his Linnaean limitations† and adopted some of the generic changes proposed by Hedwig (1792), to whom he sent specimens of most of his West Indian mosses, from which almost all of Hedwig's plates were drawn. This eliminated *Fontinalis* and *Mnium* from the West Indies and added seven genera‡ and three species to the list given in the Prodrômus; he further amplified his list by giving more in detail the stations and habitats. These are translated and quoted in the following list of species in the sequence enumerated by Swartz, with their modern names, synonyms, and distribution as at present known to us from the West Indies:

* *Fontinalis*, *Polytrichum*, *Mnium*, *Bryum*, and *Hypnum*.

† Fl. Ind. Occ. 3: 1759-1841. 1806.

‡ *Encalypta*, *Trichostomum*, *Tortula*, *Dicranum*, *Pterogonium*, *Neckera*, and *Leskea*.

1. **Neckera jamaicense** (Gmel.) E. G. Britton, comb. nov.

Fontinalis crispa Sw. Prod. 138. 1788. Not *Hypnum crispum* L.

Sp. Pl. 1124. 1753.

Hypnum jamaicense Gmel. Syst. Nat. 2: 1341. 1791.

Neckera undulata Hedw. Descr. 3: 51. 1792.

Neckera undulata Hedw.; Sw. Fl. Ind. Occ. 3: 1780. 1806.

Neckeropsis undulata Kindb. Eu. & N. A. Bryin. 1: 20. 1897.

HABITAT AND TYPE LOCALITY: "On trunks of trees in dense low woods, Jamaica."

DISTRIBUTION: Not uncommon on trees from Florida and the Greater and Lesser Antilles to Trinidad; Mexico, Guatemala, and Panama; also in South America.

ILLUSTRATIONS: Dill. Hist. Musc. 294. *pl.* 32. *f.* 8; Hedw. Descr. *pl.* 21 (from Swartz' type).

EXSICCATAE: Austin, Musci App. Suppl. 529; Sull. Musci Cub. Wright. 75; Husnot, Pl. Ant. Fr. 155; Grout, N. A. Musci Pleur. 230.

2. **NECKERA DISTICHA** (Sw.) Hedw. Descr. 3: 53. 1792

Fontinalis disticha Sw. Prod. 138. 1788.

Neckera disticha Hedw. Descr. 3: 53. 1792.

Neckera disticha Sw. Fl. Ind. Occ. 3: 1784. 1806.

Neckeropsis disticha Kindb. Eu. & N. A. Bryin. 1: 20. 1897.

HABITAT AND TYPE LOCALITY: On trunks of trees, Jamaica and Hispaniola.

DISTRIBUTION: Less common, on trees, Florida and the Greater and Lesser Antilles to South America; in Central America from Mexico to Panama; also in Africa.

ILLUSTRATION: Hedw. Descr. *pl.* 22 (from Swartz' type).

EXSICCATAE: Austin, Musci App. Suppl. 530.

3. **PTEROBRYUM FILICINUM** (Sw.) Mitt. Jour. Linn. Soc. 12: 425. 1869

Fontinalis filicina Sw. Prod. 138. 1788.

Neckera filicina Hedw. Descr. 3: 45. 1792.

Pilotrichum filicinum P. Beauv. Prod. 83. 1805.

Neckera filicina Sw. Fl. Ind. Occ. 3: 1788. 1806.

Pirella filicina Cardot, Rev. Bryol. 40: 18. 1913.

HABITAT AND TYPE LOCALITY: "Near Coldspring, high mountains of southern Jamaica, on trunks of trees."

DISTRIBUTION: Jamaica and Cuba.

ILLUSTRATION: Hedw. Descr. *pl.* 18 (from Swartz' type).

EXSICCATAE: Sull. Musci Cub. Wright. 76.

This species has immersed capsules and seems to belong where Mitten has placed it.

4. PILOTRICHUM HYPNOIDES (Sw.) P. Beauv. Prod. 83. 1805

Fontinalis hypnoides Sw. Prod. 138. 1788.

Neckera hypnoidea Hedw. Descr. 3: 43. 1792.

Neckera hypnoides Sw. Fl. Ind. Occ. 3: 1790. 1806.

HABITAT AND TYPE LOCALITY: "Jamaica, on trunks of trees in high mountains."

DISTRIBUTION: Jamaica to Trinidad.

ILLUSTRATION: Hedw. Descr. *pl.* 17 (from Swartz' type).

5. CRYPHAEA FILIFORMIS (Sw.) Brid. Bryol. Univ. 2: 251. 1827

Fontinalis filiformis Sw. Prod. 138. 1788.

Neckera filiformis Hedw. Descr. 3: 41. 1792.

Neckera filiformis Sw. Fl. Ind. Occ. 3: 1786. 1806.

HABITAT AND TYPE LOCALITY: "Hispaniola, in arid regions on branches of *Haematoxylon campechianum*."

DISTRIBUTION: Jamaica, Cuba, and Santo Domingo; also in South America, Central America and Mexico (Guatemala and Yucatan).

ILLUSTRATION: Hedw. Descr. *pl.* 16 (from Swartz' type).

EXSICCATAE: Sull. Musci Cub. Wright. 67.

6. POGONATUM TORTILE (Sw.) Brid. Bryol. Univ. 2: 108. 1827

Polytrichum convolutum Sw. Prod. 139. 1788. Not L. 1753.

Polytrichum convolutum Hedw. Sp. Musc. 94. 1801.

Pogonatum convolutum Beauv. Prod. 85. 1805.

Polytrichum tortile Sw. Fl. Ind. Occ. 3: 1839. 1806.

Polytrichum domingense Brid. Mant. 201. 1819.

Polytrichum cubense Sull. Proc. Am. Acad. 5: 281. 1861.

Polytrichum glaucinum Besch. Ann. Sci. Nat. VI. 3: 210. 1876.

Polytrichum Husnotianum Besch. l. c.

Polytrichum crispulum Besch. l. c. 211.

Polytrichum laxifolium Besch. l. c. 211.

Polytrichum Pleanum Besch. l. c. 212.

Polytrichum Sintenisii C. Müll. Hedwigia 37: 222. 1898.

Polytrichum (Catharinella) obscuro-viridis C. Müll. Hedwigia 37: 223. 1898.

HABITAT AND TYPE LOCALITY: "On clay banks, high mountains of southern Jamaica."

DISTRIBUTION: Cuba, Jamaica, Haiti, Porto Rico, Guadeloupe, Martinique, Dominica, Grenada, and Barbados.

ILLUSTRATION: Hedw. Sp. Musc. *pl.* 20.

EXSICCATAE: Sull. Musci Cub. Wright. 57; Husnot, Pl. Ant. Fr. 153.

This species varies greatly according to habitat, whether dry or wet, sunny or shady. It usually grows on roadside banks of the hard red clay, on the dry or southern sides of the West Indian islands and under such conditions, does not attain the lax, long leaves that are produced in shady moist valleys. Microscopic sections of the leaves show the lamellae to be somewhat variable but all of one generally uniform character, and though the serrations of the margins are more or less variable, the teeth being at times appressed and at others spreading, we find no constant differences between them. The presence of teeth on the back of the costa is just as true of *P. tortile* Sw. as of *P. glaucinum* Besch.

7. BREUTELIA TOMENTOSA (Sw.) Sch. "In Hb." Paris, Index Bryol. 1: ed. 2. 173. 1904

Mnium tomentosum Sw. Prod. 139. 1788.

Bryum tomentosum Sw. Fl. Ind. Occ. 3: 1837. 1806.

Bartramia macrocarpa Hampe, Linnaea 32: 141. 1863.

Bartramia macrotheca Hampe, Ann. Sci. Nat. V. 3: 373. 1866.

Breutelia macrotheca Jaeg. Adumb. 1: 556. 1873-74.

HABITAT AND TYPE LOCALITY: "On the edge of woods high mountains of Jamaica."

DISTRIBUTION: Jamaica and Guadeloupe to South America; also Mexico and Costa Rica.

ILLUSTRATIONS: Hooker, Musci Exot. *pl.* 19. 1818. From original specimen of Swartz. E. & P. Nat. Pfl. 1³: 656. *f.* 498. 1904.

8. PHILONOTIS SPHAERICARPA (Sw.) Brid. Bryol. Univ. 2: 25.
1827

Mnium sphaericarpon Sw. Prod. 139. 1788.

Mnium sphaericarpum Hedw. Descr. 3: 93. 1792.

Bryum sphaericarpon Sw. Fl. Ind. Occ. 3: 1835. 1806.

Bartramia sphaericarpa Mitt. Jour. Linn. Soc. 12: 261. 1869.

HABITAT AND TYPE LOCALITY: "In shady mossy places, summits of mountains of southern Jamaica."

DISTRIBUTION: Florida, Jamaica, Porto Rico, St. Thomas, St. Kitts, St. Vincent, Martinique, and Guadeloupe; Honduras to South America.

ILLUSTRATION: Hedw. Descr. 3: *pl.* 384.

9. DITRICHUM RUFESCENS (Hampe) Broth. in E. & P. Nat. Pfl.
1³: 300. 1901

Mnium strictum Sw. Prodr. 139. 1788. Not *Ditrichum strictum*
Hampe. 1867.

Trichostomum strictum Sw. Fl. Ind. Occ. 3: 1761. 1806.

Trichostomum pallidum strictum Schwaegr. Suppl. 2¹: 77. 1823.

Leptotrichum rufescens Hampe, Linnaea 31: 521. 1862.

Cynodontium strictum Mitt. Jour. Linn. Soc. 12: 42. 1869.

Cynodontium rufescens Mitt. Jour. Linn. Soc. 12: 44. 1869.

Leptotrichum mexicanum Sch.; Besch. Mém. Soc. Sci. Nat. Cherbourg 16: 174. 1872.

Leptotrichum capillifolium Sch.; Jaeg. Adumb. 1: 388. 1871-72.

Leptotrichum pseudo-rufescens C. Müll. Bull. Herb. Boiss. 5: 554.
1897.

HABITAT AND TYPE LOCALITY: "Jamaica, on shady slopes in sandy wet soil among other mosses, cold places."

DISTRIBUTION: Jamaica, 1,500-2,100 meters. Also, Mexico to Colombia.

ILLUSTRATION: Schwaegr. Suppl. *pl.* 123.

10. TORTULA AGRARIA (Sw.) Sw. Fl. Ind. Occ. 3: 1763. 1806

Bryum agrarium Sw. Prod. 139. 1788.

Bryum acuminatum Sw. Prod. 139. 1788.

Barbula agraria Hedw. Descr. 3: 17. 1792.

Barbula Ravi Aust. Bull. Torrey Club 6: 43. 1875.

HABITAT AND TYPE LOCALITY: "Jamaica and Hispaniola, in sugar fields and on calcareous rocks."

DISTRIBUTION: Florida and Texas. Common in the Bahamas on limestone rocks, whence it was known to Dillenius. Jamaica, Cuba, Porto Rico, Guadeloupe, Antigua, Montserrat to Trinidad and South America; also in Mexico.

ILLUSTRATION: Hedw. Descr. *pl.* 6*B*, from original specimens collected by Swartz in Jamaica and Santo Domingo.

11. *BRYUM ACUMINATUM* Sw. Prod. 139. 1788.
(See 10)

12. *SYRRHOPODON LYCOPODIODES* (Sw.) C. Müll. Syn. 1: 538.
1849

Bryum lycopodioides Sw. Prod. 139. 1788.

Dicranum? lycopodioides Sw. Fl. Ind. Occ. 3: 1766. 1806.

HABITAT AND TYPE LOCALITY: "Jamaica; in moist shady woods, on high mountains."

DISTRIBUTION: Jamaica, Santo Domingo, Haiti, Porto Rico, Guadeloupe, and Martinique to Trinidad.

EXSICCATAE: Husnot, Pl. Ant. Fr. 151.

13. *SYRRHOPODON PARASITICUS* Besch. Ann. Sci. Nat. VIII. 1: 298.
1895

Bryum parasiticum Sw. Prod. 139. 1788.

Encalypta parasitica Sw. Fl. Ind. Occ. 3: 1759. 1806.

Calymperes parasitica Hook. & Grev. Edinb. Jour. Sci. 1: 131.
1824.

The type cannot be found at Stockholm in Swartz' herbarium. A fragment of the type specimen exists at Kew, and Mitten had only two leaves of it. He states that it is very close to *Calymperes Richardi* but the illustration given by Schwaegrichen of the calyptra and the description given by Swartz, "*Calyptra longa subulata, non laxa, pallida, ore aequali, latere demum fissili*" disprove this, and it is evident, either that Schwaegrichen was mistaken in figuring a calyptra which resembles that of a *Macromitrium* or it is a species of that genus, which is very common in Jamaica. Mitten referred a specimen collected by R. Spruce in South America (no. 2) to this species but that proves to be a true *Calymperes*.

The duplicate type from which Schwaegrichen's plate was drawn has been loaned to us from Geneva and corresponds with all of this plate except the calyptra, which is lacking; but the hyaline basal cells are not clearly indicated. It is evidently a species of *Syrrhopodon* with entire leaf margins bordered by elongated cells and does not agree with any known to us thus far from the West Indies.

HABITAT AND TYPE LOCALITY: Hispaniola. "On branches of *Haematoxylon* and *Mimosa Unguis-cati*."

DISTRIBUTION: Known only from the original collection.

ILLUSTRATION: Schwaegr. Suppl. 1: 60. *pl.* 17. 1811.

14. HOLOMITRIUM CALYCINUM (Sw.) Mitt. Jour. Linn. Soc. 12: 60. 1869

Bryum calcycinum Sw. Prod. 139. 1788.

Weisia calycina Hedw. Sp. Musc. 70. 1801.

Cecalophum? calicinum Beauv. Prod. Aetheog. 50. 1805.

Dicranum calycinum Sw. Fl. Ind. Occ. 3: 1768. 1806.

HABITAT AND TYPE LOCALITY: "On roots of trees in high mountains. Jamaica."

DISTRIBUTION: Known only from Jamaica.

ILLUSTRATION: Hedw. Sp. Musc. *pl.* 14. *f.* 1-5.

15. FISSIDENS PALMATUS (Sw.) Hedw. Descr. 3: 69. 1792

Hypnum palmatum Sw. Prod. 140. 1788.

Dicranum palmatum Sw. Fl. Ind. Occ. 3: 1774. 1806.

Skitophyllum palmatum De la Pyl. Jour. de Bot. II. 4: 146. 1814.

HABITAT AND TYPE LOCALITY: "In shady clayey places at roots of palms. Jamaica. Collected also on high trunk of *Areca oleracea*, in a cavity filled with rotten leaves."

DISTRIBUTION: Jamaica, Cuba, and St. Thomas.

ILLUSTRATIONS: Hedw. Descr. *pl.* 30A. 1792 (from Swartz' type); De la Pyl. Jour. de Bot. *pl.* 35. *f.* 6. 1814.

EXSICCATAE: Sull. Musci Cub. Wright. 11.

16. FISSIDENS POLYPODIOIDES (Sw.) Hedw. Descr. 3: 63. 1792

Hypnum polypodioides Sw. Prod. 140. 1788.

Dicranum polypodioides Sw. Fl. Ind. Occ. 3: 1772. 1806.

Skitophyllum polypodioides De la Pyl. Jour. de Bot. II. 3: 153. 1814.

HABITAT AND TYPE LOCALITY: "On the ground in shady mossy slopes in high mountains, Jamaica."

DISTRIBUTION: Georgia, Alabama, Florida, and Louisiana; Jamaica, Cuba, Haiti, Porto Rico; Dominica, Guadeloupe, and Martinique, to South America; also, Mexico, Guatemala, and Panama.

ILLUSTRATIONS: Sull. Icon. Musc. *pl.* 27; De la Pyl. l. c. *pl.* 38. *f.* 10.

EXSICCATAE: Drummond, Musci Am. ed. 2. 38; Sull. & Lesq. Musci Bor. Am. ed. 2. 87; Sull. Musci Cub. Wright. 10; Small, Mosses So. U. S. 9; Husnot, Pl. Ant. Fr. 133.

17. *FISSIDENS ASPLENIOIDES* (Sw.) Hedw. Descr. 3: 65. 1792

Hypnum asplenioides Sw. Prod. 140. 1788.

Dicranum asplenioides Sw. Fl. Ind. Occ. 3: 1770. 1806.

Skitophyllum asplenioides De la Pyl. Jour. de Bot. II. 4: 156. 1814.

Fissidens Barbae-montis C. Müll.; Ren. & Card. Bull. Soc. Roy. Bot. Belg. 31: 152. 1892.

Fissidens costaricensis Besch. Bull. Herb. Boiss. 2: 390. 1894.

HABITAT AND TYPE LOCALITY: "On mossy rocks in high mountains of Jamaica."

DISTRIBUTION: Jamaica and St. Kitts; also Mexico and Costa Rica.

ILLUSTRATIONS: Hedw. Descr. *pl.* 28 (from type); De la Pyl. Jour. de Bot. II. 4: *pl.* 38. *f.* 8, 9.

EXSICCATAE: Pringle, Musci Mex. 10,503.

18. *PHYLLOGONIUM FULGENS* (Sw.) Brid. Bryol. Univ. 2: 671.

1827

Hypnum fulgens Sw. Prod. 140. 1788.

Pterigynandrum fulgens Hedw. Descr. 4: 101. 1797.

Pterogonium fulgens Sw. Fl. Ind. Occ. 3: 1776. 1806.

? *Phyllogonium viride* Brid. Bryol. Univ. 2: 673. 1827.

Phyllogonium aureum Mitt. Journ. Linn. Soc. 12: 424. 1869.

Phyllogonium globitheca C. Müll. Bull. Herb. Boiss. 5: 563. 1897.

HABITAT AND TYPE LOCALITY: "Dependent from branches of trees in high mountains of Jamaica."

DISTRIBUTION: Jamaica, Cuba, Haiti, Porto Rico, St. Kitts, Antigua, Montserrat, Guadeloupe, Martinique, St. Vincent, and Grenada to Trinidad. Also in South America.

ILLUSTRATION: Hedw. Descr. *pl.* 39 (from type).

EXSICCATAE: Sull. Musci Cub. Wright. 131; Husnot, Pl. Ant. Fr. 154.

There is some doubt as to what the type specimen of *Phyllogonium viride* of Bridel is. The type locality is Brazil and it is just possible that the name may antedate either *P. immersum* Mitt. or *P. Serra* C. Müll. Both these species were distributed by E. Ule in his Bryotheca Brasiliensis no. 81 from Serra Geral, Province of Santa Catharina, Brazil. All the West Indian specimens, so-called, are referable to *P. fulgens*.

19. LEPIDOPILUM DIAPHANUM (Sw.) Mitt. Jour. Linn. Soc. 12: 382. 1869

Hypnum diaphanum Sw. Prod. 140. 1788.

Hypnum diaphanum Hedw. Sp. Musc. 243. 1801.

Hypnum? *diaphanum* Sw. Fl. Ind. Occ. 3: 1828. 1806.

Pterygophyllum diaphanum Brid. Bryol. Univ. 2: 345. 1827.

Hookeria diaphana W.-Arn. Disp. Musc. 56. 1825.

HABITAT AND TYPE LOCALITY: "In depressions, mountains of Jamaica. Mixed with *Marchantia* and *Jungermannia*."

DISTRIBUTION: Jamaica, Martinique.

ILLUSTRATIONS: Hedw. Sp. Musc. *pl.* 61. f. 1-6 (from type).

20. CYCLODICTYON ALBICANS (Sw.) Broth. in E. & P. Pfl. 1³: 935. 1907

Hypnum albicans Sw. Prod. 140. 1788.

Hypnum albens Gmel. Syst. Nat. 2: 1343. 1791.

Leskea albicans Hedw. Sp. Musc. 218. 1801.

Leskea albicans Sw. Fl. Ind. Occ. 3: 1811. 1806.

Hypnum pallidum Brid. Musc. Rec. 2²: 127. 1806.

Pterygophyllum albicans Brid. Bryol. Univ. 2: 349. 1827.

HABITAT AND TYPE LOCALITY: "On old and rotten trunks of trees, temperate regions of Jamaica."

DISTRIBUTION: Jamaica, Guadeloupe, St. Vincent, and Mexico.

ILLUSTRATIONS: Hedw. Sp. Musc. 218. *pl.* 54. f. 13-16 (from type).

EXSICCATAE: Pringle, Musci Mex. 10,664.

21. HOMALIA GLABELLA (Sw.) Mitt. Jour. Linn. Soc. 12: 458.
1869

Hypnum glabellum Sw. Prod. 140. 1788.

Leskea glabella Hedw. Sp. Musc. 235. 1801.

Neckera glabella Sw. Fl. Ind. Occ. 3: 1782. 1806.

HABITAT AND TYPE LOCALITY: "On trunks of trees in mountains of Jamaica."

DISTRIBUTION: Jamaica, Porto Rico, Guadeloupe, Mexico, Costa Rica, to Venezuela.

ILLUSTRATION: Hedw. Sp. Musc. *pl.* 59 (from type specimens).

22. METEORIOPSIS PATULA (Sw.) Broth. in E. & P. Pfl. 1³: 825.
1906

Hypnum patulum Sw. Prod. 140. 1788.

Hypnum patulum Hedw. Sp. Musc. 279. 1801.

227. 1872.

Meteorium diversifolium Besch. l. c.

Meteorium torticuspis C. Müll. Bull. Herb. Boiss. 5: 204. 1897.

HABITAT AND TYPE LOCALITY: "On roots and branches of trees near the summits, mountains of Jamaica."

DISTRIBUTION: Florida, in hammocks near Cutler, *J. K. Small*; Jamaica, Haiti, Porto Rico, Guadeloupe, Martinique, Dominica, Montserrat, St. Vincent, Grenada, and Trinidad to South America; also Mexico, Guatemala, Honduras, Costa Rica, and Panama.

ILLUSTRATION: Hedw. Sp. Musc. *pl.* 73.

EXSICCATAE: Sull. Musci Cub. Wright. 80; Husnot, Pl. Ant. Fr. 168; Pringle, Musci Mex. 15, 136.

This is a common and variable species in the tropics and accordingly has received a variety of names. There seems to be no reason for maintaining two sections and such a host of names in this genus, for according to Mitten and R. S. Williams the following also are synonyms of this species: *M. aureo-nitens* Hampe (not Hook.), *M. barbipendulum* C. Müll.; *M. cirrifolium* Schw.,

M. chiriquense Ltz., *M. Eurhynchium* C. Müll., *M. Filicis* C. Müll., and *M. subambiguum* (Hampe) Paris.

Papillaria nigrescens Donnellii Aust. Musci App. Suppl. 14. 1898.

HABITAT [AND TYPE LOCALITY: "On branches of trees, high mountains of Jamaica. Collected on *Anacardium occidentale*."

DISTRIBUTION: Louisiana, Florida, and the Bahamas; Jamaica, Cuba, Haiti, Porto Rico, Barbados, and Trinidad to South America; also in Lower California, Mexico, Guatemala, Costa Rica, and Panama. Also in South America.

ILLUSTRATIONS: Hedw. Sp. Musc. pl. 65. 1801; Schwaegr. Suppl. pl. 244. 1828; Bryologist 7: 14. 1904.

EXSICCATAE: Austin, Musci App. Suppl. 533; Sull. Musci Cub. Wright. 83.

The var. *Donnellii* is simply a xerophytic condition in which the leaves fall off and the terminal branches become brittle, thus propagating the species; in fact, the fruit is seldom found. Austin and J. D. Smith collected it at Caloosa, Florida, in 1876-78 and Mr. Severin Rapp has reported it from Sanford. In all our Jamaica collections I have found it but once, on a calabash tree.

28. PRIONODON DENSUS (Sw.) C. Müll. Bot. Zeit. 2: 130. 1844

224. 1876.

Palamocladium trichophyllum C. Müll. Flora 82: 465. 1896.

Palamocladium trichophyllum subtile C. Müll. Hedwigia 37: 240. 1898.

Orthothecium trichophyllum Fleisch. Fl. Buit. 3: 667. 1906.

Plants light yellowish green, glossy; stems rooting and creeping, with simple erect branches, often 2 cm. high and prolonged into slender flagellate branchlets bearing brown septate gemmae in clusters in the axils of the upper leaves; branch-leaves crowded, spreading, glossy, strongly plicate when dry, lanceolate-acuminate, 3-5 mm. long, ecostate, margins plane, serrate; cells linear, walls porose, slightly thickened, alar cells shorter and broader, curved, forming a small, serrate auricle. Autoicous, perichaetial leaves shorter, paler, more suddenly subulate, more sharply serrate. Seta erect, straight or flexuose, red, 15-25 mm. long; calyptra cucullate; capsule erect, ovoid-cylindric, sometimes contracted below the mouth when dry, 2-3 mm. long, lid rostrate; annulus none; walls with irregular square or hexagonal cells $27-54\ \mu$ long $\times 27\ \mu$ wide; neck short, stomatose; peristome double; teeth incurved, brown, narrow, not perforate, papillose, with slightly trabeculate lamellae; endostome paler, also papillose with a short basal membrane and rudimentary or imperfect cilia, segments shorter than the teeth, not split along the keel; spores green, minutely papillose, unequal in size, $5\ \mu-16\ \mu$, maturing in winter.

Forming bright glossy mats in shade on trunks and roots of tree-ferns and palms on high mountains, rarely on rocks. Fruit rare!

HABITAT AND TYPE LOCALITY: "On bark and trunks of old trees, Jamaica."

DISTRIBUTION: Jamaica, Cuba, Porto Rico, Haiti, Santo Domingo, St. Kitts, Dominica, Martinique. Guadeloupe, St. Vincent, Montserrat, and Trinidad to Venezuela.

ILLUSTRATIONS: Hedw. Sp. Musc. pl. 71; E. & P. Nat. Pfl. 1³: 773. f. 580 J-L.

EXSICCATAE: Husnot, Pl. Ant. Fr. 183, as *Meteorium sericeum* Sch.

On account of the rarity of its fruit this species has been placed in a variety of genera none of which seem to me to be correct. Its double peristome and different habit remove it from *Lepyrodon* and its tropical distribution from *Orthothecium*, the species of which are alpine or arctic and subarctic. Its relationship however seems to me to be more with the *Entodontaceae*, where Fleischer

has placed it; the presence of septate gemmae, and the ecostate leaves and more or less imperfect endostome, show its relationship to *Clastobryum indicum* Dozy & Molk. as figured by Brotherus (E. & P. Nat. Pfl. 1³: 874. f. 640. 1907) but the leaf cells are porose and the walls are thickened as shown on the same page in f. 639 of *C. planulum* Mitt.

Clastobryum americanum Cardot, originally described from Mexico, also occurs on the slopes and summit of Sir John Peak above Cinchona, in the Blue Mountains of Jamaica, and Mr. R. S. Williams has collected it in Bolivia at 8,000 ft. near Cargadera in 1902.

DISTRIBUTION: Jamaica, Haiti, Montserrat, and Dutch Guiana.

ILLUSTRATION: Hedw. Sp. Musc. *pl.* 74. *f.* 4-7. 1801.

Excepting for the illustration given by Hedwig, little is known of this species in modern times. Mitten and Brotherus had not seen specimens. At the British Museum there is a specimen labelled "*Leskea congesta* Sw. Ind. Occ. ex *Cl. Swartzio*. J. Vahl," which is evidently a mixture of *Palamocladium leskeoides* and *Clastobryum trichophyllum*. Hedwig's description calls for a plant with entire somewhat secund, falcate leaves and a horizontal capsule, characters which do not agree with either of the species named above.

The synonymy of *Palamocladium* is as follows:

- Palamocladium leskeoides*** (Hook.) E. G. Britton, comb. nov.
Hookeria leskeoides Hook. Musc. Exot. *pl.* 55. 1818.
Leskea Bonplandi Hook.; Kunth. Syn. Pl. Aeq. 1: 61. 1822.

Tortula linearis Sw. Fl. Ind. Occ. 3: 1765. 1806.

Barbula linearis Brid. Mant. Musc. 88. 1819.

Trichostomum lineare Broth. E. & P. Nat. Pfl. 1³: 394. 1902.

HABITAT AND TYPE LOCALITY: "On dry calcareous rocks, Hispaniola."

DISTRIBUTION: Jamaica, Cuba, and Haiti.

Our specimens from Jamaica and Cuba have a well-developed, slender peristome, which disappears from the old capsules. I believe this species to be congeneric with *Turckheimia guatemalensis* Broth., which also shows traces of a peristome though the capsules are all old. The section of the leaf in *T. linearis* is remarkable for having two rows of guide-cells of about 10 cells each in the costa, with a stereid band both above and below. The costa is rather broader than in *T. guatemalensis* and smooth on the dorsal side, showing as a prominent white rib to the leaf. It is papillose on the upper surface and the cells of the blade bear several minute papillae on both surfaces. This peculiarity of the costa removes *Turckheimia linearis* from *Trichostomum*; and although there is but a single row of guide-cells in *T. guatemalensis*, their macroscopic resemblance is so close that they appear to be congeneric.

DISTRIBUTION: Jamaica, Cuba, Haiti, Guadeloupe, Martinique, St. Lucia, to Trinidad and South America; also Bermuda, and Louisiana to Florida.

EXSICCATAE: Sull. Musci Cub. Wright. 107.

According to Dr. Andrews' notes "the Swartz specimens, which are deposited in the collections of the Naturhistoriska Riksmuseum at Stockholm, are distributed through the herbarium of non-Scandinavian mosses, which are, in general, arranged after Paris's Index. Packets are generally uniform, one to many on the herbarium sheet. Swartz' specimens are recognizable by labels in his handwriting included in the packet, by the kind of paper with water-mark to which he pasted them and references of others to the origin of specimens."

We have seen specimens of all but two of these species, and have duplicates of many of them; it is therefore our intention to distribute sets of these and other West Indian mosses, in exchange for other exsiccatae and duplicates from the West Indies, Central America, and South America.

NEW YORK BOTANICAL GARDEN

Explanation of plate 25

Clastobryum trichophyllum (Sw.) E. G. Britton

The figures were drawn from magnifications three times as great as expressed in the numbers, which represent the magnifications of the figures as they stand in the reproduction.

1. Plant, natural size.
2. Portion of branch showing the flagellate branches and gemmae, $\times 2\frac{2}{3}$.
3. Outline of stem leaf, $\times 16\frac{2}{3}$.
- 4, 5. Outlines of branch leaves, $\times 16\frac{2}{3}$.
6. Apex of leaf, $\times 108$.
7. Basal portion of leaf, showing the auricle, $\times 108$.
8. Median cells, $\times 263$.
9. Apex of leaf showing the pores in the walls of the apical cells, $\times 263$.
10. Cross section of leaf, $\times 140$.
11. Branch with gemmae, $\times 85$.
12. Gemma, $\times 138$.
13. Cross section of stem, $\times 140$.
14. Perichaetial bud, leaves of one side removed to show the paraphyses and archegonia, $\times 12$.
15. Capsule, $\times 10$.
16. Calyptra, $\times 10$.
17. Stoma from base of capsule, $\times 195$.
18. Portion of peristome and upper part of capsule, $\times 195$.
19. Spores, $\times 195$.

CLASTOBRYUM TRICHOPHYLLUM (Sw.) E. G. Britton
